

## Personal Assignment 3

### Exercise 4 – Weekly Project Report ( this will be recurrent each week to evaluate the involvement of the individual students in the project)

- (a) When and for how many minutes did you participate in the weekly project work? Please give just approximate numbers, you do not have to count the minutes exactly! **(T.3 pts.)**
- (b) Describe in exactly 10 keywords, what your project work was focusing on in this week (like “paper reading”, “GUI implementation”, “data parsing” and so on). If you feel you do not have something to do, please discuss with your group to give you some work to do! The group as a whole is responsible for distributing the work equally among the group members and to find functionality worth implementing or papers worth reading! **(T.5 pts.)**
- (c) Describe in 2 to 4 sentences what you found positive and what was negative this week! **(T.2 pts.)**

### Exercise 4 – Design and Visualization

- (a) Design and implement a visualization/s for the tasks that you have defined in your personal assignment 2. They should be different than what your group has presented in assignment 3. If you consider your tasks of assignment 2 not adequate anymore, you can just propose new ones. Mention which attributes are part of the visualization **(T,I, 6 pts.)**
  - (b) Justify your choices of marks and visual channels of the visualizations you have designed. Are the visual channels you are using separable? Why? **(T,4 pts.)**
-
